- (f) whether the Government plans to provide lab-based skills to the existing diamond cutting and polishing workers to increase their employment opportunities in the lab-based diamond industry and if so, the details thereof and if not, the reasons therefor?

ANSWER

वाणिज्य एवं उद्योग मंत्रालय में राज्य मंत्री (श्रीमती अनुप्रिया पटेल)

THE MINISTER OF STATE IN THE MINISTRY OF COMMERCE AND INDUSTRY
(SMT. ANUPRIYA PATEL)

- (a) and (b) The details of exports of Lab Grown Diamonds (LGD) during last 5 years are as under: -

Year	Exports	
	US\$ Million	% Growth
2017	163.37	-
2018	259.19	59%
2019	445.56	72%
2020	532.35	19%
2021	1,178.77	121%
2022	1,780.59	51%

Source: DGCIS

(c) to (f) The natural diamond market in India is marginal and most of the diamonds cut and polished in India are exported. LGDs are a low cost alternative to natural diamonds, having same chemical and optical properties. As a result, higher production of LGD will further reduce costs and that is expected to expand the diamond market in India. Natural diamond production has peaked and is expected to decline in medium to long term. With the introduction of LGDs, the aggregate consumption of diamonds would increase thereby increasing employment opportunities. LGDs being chemically and optically same as natural diamonds, the skill set required for cutting and polishing of LGDs are similar to that of natural diamonds.

(c) Month-wise details of India's exports of wheat, sugar and non-basmati rice during the current financial year are given below: -

* Export of wheat was prohibited vide DGFT Notification dated 13th May, 2022

** Export of sugar was restricted vide DGFT Notification dated 24th May, 2022

***Export of broken rice was prohibited vide DGFT Notification dated 8th September, 2022. Export duty of 20% was imposed on export of other non-basmati varieties excluding parboiled rice.

Exports of wheat have declined after the export was prohibited in May 2022. Monthly exports of non-basmati rice, from September 2022 onwards, have also remained lower than the pre-restrictions level

of August 2022. With effect from 1st June 2022, export of sugar is allowed only with specific permission from Directorate of Sugar, Department of Food & Public Distribution. This has been done to prevent uncontrolled export of sugar and to ensure sufficient availability of sugar for domestic consumption at a reasonable price. Monthly exports of sugar from June 2022 onwards have remained below the pre-restriction level of May 2022, except in the month of December 2022.

(d) Certain agriculture products including cashew, sesame seeds, walnuts etc. are imported and are then exported after processing and value-addition in India.

(e) The details of India's imports of agriculture products with amount spent during the last five years are at Annexure-III.

Annexure referred to in reply to parts (a) and (b) of Lok Sabha Unstarred Question No. 5315 for answer on 05.04.2023.
